

EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
Master of Technology	Visvesvaraya National Institute of Technology ,Nagpur	8.83/10 (Current)	2027 (Expected)
Bachelor of Technology	SVERI's College Of Engineering, Pandharpur	9.5/10	2025
Senior Secondary	KBP College, Pandharpur	91.16%	2021
Secondary	Kawathekar Prashala, Pandharpur	92.60%	2019

PROJECTS

- VerdictIO - Online Coding Judge Platform

Self Guided

– Built **VerdictIO**, a full-stack online coding judge platform with role-based access, enabling admins to manage coding problems, test cases, tags, and difficulty levels, and allowing users to solve and submit solutions in **C++** and **Python**.

– Developed a secure **Docker-based** code execution system with execution time limits, memory restrictions, disabled network access, and automated verdict generation for **Accepted**, **Wrong Answer**, **Compilation Error**, **Runtime Error**, and **Time Limit Exceeded**.

– Designed an asynchronous submission pipeline using **Redis** and **PostgreSQL**, and built a **React + Monaco Editor** interface featuring problem filtering, submission history.

GitHub
- CollabDocs - Real-Time Collaborative Document Editor

Self Guided

– Built **CollabDocs**, a full-stack real-time collaborative document editor that allows multiple users to create, edit, and manage documents simultaneously with live cursor tracking.

– Implemented secure user authentication with **JWT** and role based document sharing that supports **Editor** and **Viewer** access.

– Developed rich text editing features using **Tiptap**, including formatting tools such as bold, italics, lists, headings along with auto save and document restoration through version history.

– Integrated **Socket.IO**, **MongoDB Atlas**, and **Cloudinary** to support real-time collaboration, active user presence, image uploads in a **React + Node.js + Express** application.

GitHub
- Distributed File Storage System

Self Guided

– Built a distributed file storage system in **C++** using **TCP socket programming**, enabling file chunking, multi-node storage, and reliable data retrieval.

– Designed a **master-server architecture** to manage chunk distribution and metadata mapping across storage nodes.

– Implemented **replication and fault tolerance**, ensuring high availability and resilience against node failures.

– Developed a custom **TCP-based communication protocol** to handle file upload, download.

GitHub
- SyntaxShare - Developer Knowledge Sharing Platform

Self Guided

– Built a full-stack developer platform using **React**, **Node.js**, **Express**, and **MongoDB**, enabling users to create, share, and manage technical articles and code snippets.

– Implemented a **rich text editor with Markdown support** and **syntax highlighting** to enhance readability of technical content.

– Developed secure **JWT-based authentication** and user profile management for personalized dashboards and content ownership.

– Designed **RESTful APIs** for post creation, bookmarking, and content retrieval, ensuring efficient backend communication.

GitHub

TECHNICAL SKILLS

- **Programming Languages:** C/C++ , JavaScript , Python
- **Technologies & Frameworks:** React.js , Node.js , Express.js , Tailwind CSS , TCP Socket Programming
- **Databases:** MySQL , MongoDB , PostgreSQL
- **Tools & Platforms:** Git , Cloudinary , Vercel , Postman , VSCode , MongoDB Atlas

KEY COURSES TAKEN

Data Structures & Algorithms , Operating Systems , Object-Oriented Programming , Computer Networks , Database Management Systems , Distributed Systems , Advanced DBMS
